Education

University of Florida, Gainesville, FL
Anticipated Graduation - May 2027

B.S. in Mechanical Engineering - Certificate in A.I.
GPA: 3.73

Job Experience

- L'Oréal USA, *Product Development Intern* - Clark, NJ June 2026 - August 2026
- Built a custom dashboard using Claude to standardize and compare pre-bases across complexity, SKU count, and development criteria to **cut discontinuation decision making time by 70%**.
 - Orchestrated the **SB-343 recycling symbol rollout across 90+ SKUs**, aligning cross-functional teams from project kickoff through artwork updates.
 - Analyzed the portfolio-wide impact of an **18-to-20-point carton material change**, using packaging and SKU data to identify a \$350K pricing impact across multiple families.
 - **Led Excellence Ultra Care development activities**, coordinating component ordering, testing, status meetings, and cross-functional execution to maintain project timelines.
- Cuso's Seasonings, *A.I. Operations Contractor* - Lincoln, CA (Remote) June 2026 - Present
- Built and deployed **3 AI-driven automation workflows** across Gorgias, Air, and ClickUp, reducing manual support handling by **45%**.
 - Implemented a **Shopify–ShipBob address cross-check workflow** across **1,200+ orders**, preventing fulfillment errors and reducing re-ship risk.
- Huupе, *Intern & Product Development Engineer* - Irvine, CA (Remote) May 2025 - Present
- Developed **300+ customized workout plans** using analytical modeling and Excel-based systems to organize training data and standardize workout development.
 - Created and utilized a MATLAB coding model that automated workout variety and **reduced workout generation time by more than 50%**.
- Cope Custom Kicks Personal Business, *Founder and Artist* - Gainesville, FL June 2019 - Present
- Founded and operated a profitable custom sneaker design business that achieved **54% annual price growth**, managing client acquisition, budgeting, and full-cycle production.
 - Designed and airbrushed **50+ unique sneakers** for clients nationwide, applying stencils, and color theory to deliver professional results while developing repeatable processes to ensure quality and durability in production.
- MJ Daly Mechanical Contracting, *Intern & Assistant Project Engineer* - Waterbury, CT July 2023 - August 2024
- Led the closeout of a **\$10M mechanical systems project**, applying project management integrity in delivering accurate technical documentation from design through installation, testing, and client handoff.

Campus Involvement

- UF Product Space, *Fellow* September 2025 - May 2026
- Completed an **8-week product management fellowship and part-time startup internship**, applying market research, competitive analysis, product scoping, and rapid prototyping to solve a real client product challenge.
- University of Florida Women's Basketball, *Student Manager* August 2023 - Present
- Managed practice and game-day logistics in a high-pressure athletics environment, **adapting quickly to shifting priorities** while supporting drills, equipment, and team operations.
