AIR FORCE 1 LOW

Fall '83

Model Name	NIKE AIR FORCE 1 LOW
Forecast	25,000 PAIRS - U.S. ESTIMATE
Gender	MEN'S
Size Range	MEN'S U.S. 7-13 (W/ HALF SIZES) 14-15 - SUBJECT TO DEMAND
Sample Size	MEN'S U.S. - SIZE 9
Retail/Wholesale Price	$65.00/$32.50
Target FOB	$13.00
Life Cycle	12-18 MONTHS
Distribution Plan	U.S. ATHLETIC FOOTWEAR REATILERS AND SPORTING GOODS STORES

Objective

Extend Nike Air basketball cushioning into a low-cut option for players who prefer a lower collar. The low-top may also promote increased casual wear of the popular Air Force 1 silhouette.

Target Consumer

Target competitive high school, collegiate, and recreational basketball players seeking premium cushioning, court traction, and reliable support. Appeal to athletes who prioritize performance and mobility, with secondary interest from consumers seeking versatile athletic footwear for casual wear.

Last

New - low-top variation of the existing Air Force 1 high-top last

Challenges

- Cost
- Weight
- Ankle Support
- Fit and Heel Retention

Heroes

- NIKE Air Force 1 Silhouette
- NIKE Air Cushioning System
- Low-Top Design
- Leather Support Upper
- Circular Unit-sole Traction Pattern

Key Product Features

1. Premium leather upper with reinforced panel construction
2. Low-cut padded collar to accommodate ankle mobility
3. Perforated leather toe panel to improve ventilation
4. Traditional adjustable lace closure
5. Encapsulated Nike Air-Sole cushioning

Material Information

Upper Materials:
- Full-Grain Leather (Vamp, Quarter Panels & Overlays)
- Perforated Leather (Toe Box)
- Leather (Nike Swoosh Overlays)
- Reinforcement Materials (Toe & Heel)

Midsole Materials:
- Rubber Cupsole Construction
- Encapsulated Nike Air-Sole Cushioning Unit
- Foam Cushioning / Filler (Exact Composition Unconfirmed)

Outsole Materials:
- Durable Molded Rubber
- Concentric Circular Pivot Traction Pattern
- Textured Perimeter Traction

Tongue Materials:
- Leather / Textile Outer Construction
- Foam Padding Interior
- Woven Nike Logo Label

Other Materials:
- Textile Collar Lining with Foam Padding
- Flat Woven Textile Laces
- Cushioned Sockliner with Textile Top Cover
- Leather Heel Tab with Nike Branding
- Synthetic Thread – Upper Panel Stitching

THREE KEY REVIEW GATES

GATE 1	GATE 2	GATE 3
May 21, 1982	**July 23, 1982**	**November 24, 1982**
Full product scrutiny	Wear-test authorization	Design confirmation

TARGET DATE	FACTORY ACTION / DELIVERABLE
February 6, 1982	Brief issued / factory development kickoff
March 26, 1982	Pullover review — shell pattern and appearance only
May 21, 1982	**GATE 1 — complete sample scrutiny**
July 23, 1982	**GATE 2 — fit review and wear-test approval**
August 16 – September 24, 1982	Wear test — no sample changes during testing
October 1, 1982	Wear-test readout / authorize revisions
November 24, 1982	**GATE 3 — design confirmation**
February 4, 1983	Final BOM, costing and sourcing approval
March 17, 1983	Size-set / commercialization approval
April 15, 1983	Pre-production sample approval / materials ready
April 29, 1983	Pilot production and quality approval
June 18, 1983	Bulk production complete / final inspection
July 23, 1983	Freight, customs and U.S. inventory receipt
August 6, 1983	**FALL 1983 TARGET RETAIL LAUNCH**

NIKE Air Force 1 Low

Wear Test Plan

01 TEST OVERVIEW

TEST WINDOW	August 16 - September 24, 1982
SAMPLE ALLOCATION	16 pairs requested (12 test + 4 reserve / replacement)
TEST GROUP	Competitive basketball players; recruited by Wear Test Analyst
PRODUCT	AF1 Low - Gate 2 approved sample; men's sample-size run

02 WEAR TEST SEQUENCE

DATES	TEST TYPE	PURPOSE
Aug 16-20, 1982	**Fit & Feel**	Brief fit, pressure and comfort review
Aug 23-27, 1982	**Dynamic**	Court cuts, stops, jumps; triad observes
Aug 30-Sep 10, 1982	**Short Term**	Player feedback and performance issues
Aug 16-Sep 24, 1982	**Long Term**	Durability, outsole wear and cushioning

03 EXECUTION & CONTROL

PRE-TEST RELEASE	Only approved, comfortable Gate 2 product enters external testing.
PROTOTYPE SECURITY	Use understated, unbranded / low-visibility test color where needed.
TEST ADMINISTRATION	Analyst selects testers and issues wear logs; no unapproved modifications.
OBSERVATION	Designer + Developer + Analyst attend dynamic assessment (triad).
CHANGE FREEZE	Do not change tested construction during wear-test period.

04 REVIEW / DECISION

September 27 - October 8, 1982

Analyst consolidates fit, performance, durability and failure feedback.
Review findings before authorizing revisions. Gate 3: November 24, 1982.

NIKE Air Force 1 Low
Launch Email

FROM: aidan.copeland@nike.com
TO: Factory Product Development Team
DATE: February 6th, 1982
SUBJECT: NIKE Air Force 1 Low - Fall '83 - *TECH PACK RELEASE*

Hello Team,

Please proceed with development of the NIKE Air Force 1 Low for Fall of 1983. The initial tech pack is released for factory review and I have attached it to this email. Please identify any questions you may have before preparing samples. Can't wait to work together on this project!

MODEL OVERVIEW
Season: Fall 1983
Retail/TFOB: $65/$13
Forecast: 25,000 pairs (estimate)
Sizes: Men's U.S. 7-13
Sample Size: U.S. M9

RELEASED TECH PACK
Marketing brief, CAD drawings, component + material + construction callouts, Bill of Materials, Shell Pattern, Tooling Drawing, Preliminary CBD, Work-back Calendar and Wear Test Plan are included.

PRODUCT HEROES
Low-cut leather basketball upper; encapsulated heel Nike Air-Sole cushioning; durable rubber bottom with circular pivot traction; secure heel fit and large Swoosh branding.

PRODUCT CHALLENGES
Upper fit to last; heel retention and collar comfort; cost; consistent panel stitching; Air-Sole placement and bottom unit assembly; Leather yield under wear.

SAMPLE REQUEST + REVIEW DATES
Pullover Sample Needed in Hand By: March 19th, 1982
Gate 1 Sample Needed in Hand By: May 14th, 1982
Gate 2 Sample Needed in Hand By: July 21st, 1982
Gate 3 Sample Needed in Hand By: November 22nd, 1982

Thank you,
Aidan Copeland
